

- 1 **The Assembly Line**
- 2 **1. Qualities that Factory Owners Looked for in Workers**
 - Wanted workers to be more productive: quantity
 - Wanted workers to help companies become more competitive
- 3 **2. Father of Scientific Management**
 - Frederick Winslow Taylor
 - Measured workers movements to complete a task, then tried to decrease the movements so workers could produce more
- 4 **3. Characteristics of assembly line work: specialization of labor**
 - Mechanized line
 - Each worker completes a single task over and over again
 - Work required little movement
- 5 **4. Henry Ford made the assembly line famous**
 - Cut the cost to produce cars so many people could have them
 - Minimized variety and originality in cars
- 6 **5. Affect of the Assembly Line on Workers**
 - Tiresome and repetitive
 - Some owners tried to control their workers' whole lives by building "company towns"
 - Some workers weren't paid in cash
 - Workers had little power
